

# MANUFACTURING SUPPLY CHAIN

## ACCELERATOR FOR PACKAGING PERFORMANCE

- ✓ Try Before You Buy
- ✓ Pilot a Proven Solution to Rapidly Demonstrate Business Value In Your Packaging Environment
- ✓ Leverage Proven Products and Expert Services to Implement Best Practices
- ✓ Launch Your Drive Toward Operational Excellence, and Packaging Performance

**Be smart.** An Accelerator Packaging Performance Solution project allows you to evaluate the capabilities and business benefits that the solution provides without a large up-front cost.

**Avoid risks.** Try out the solution as a pilot in your packaging environment, to make sure that it meets your expectations, before purchasing the software.

**Apply best practices.** Pilot the full-featured Packaging Performance Solution application, which embodies proven best practices, for a portion of your plant without buying the software.

After the Accelerator pilot is complete, you can:

- Purchase the software for the pilot area
- Purchase the software to expand the solution across your entire plant
- Return the software without any charge for the software

Packaging performance is becoming increasingly critical to a manufacturer's overall business performance. Supply chain responsiveness and order fulfillment are dependent upon reliable, efficient, high performance packaging operations. But keeping packaging operations running in an optimal manner is very challenging - especially considering the difficulties associated with access to real-time packaging line data as well as mechanisms to monitor, analyze, and troubleshoot problems in a timely manner.

Accelerator for Packaging Performance is a powerful, out-of-the-box software and services solution that offers a low-risk, proven approach to dramatically improve packaging performance. Our programmatic approach to packaging performance is based on an Operator-centric performance management paradigm for real-time process tuning and improvement. This approach makes your packaging personnel more effective by giving them the proper tools, training, and knowledge to do their jobs better, by helping them focus on high value activities.

### Capabilities

Accelerator for Packaging Performance combines full-featured software and a rapid engagement model that allows our clients to drive rapid deployment of a standardized packaging best practices solution that delivers rapid ROI and sustainable operational performance.

## ACCELERATOR FOR PACKAGING PERFORMANCE

### About Accelerator

EnteGreat and GE Intelligent Platform's Accelerator solutions are out-of-the-box software applications and services combined into one convenient, low-risk, low-cost package. Accelerator leverages proven products and best practices to rapidly demonstrate the value of GE's Proficy software and EnteGreat's Packaged Solutions by combining the right mix of solution components to drive improved Packaging Performance.

- **Rapidly proves value:** Achieve demonstrable business results in weeks rather than the months or years of traditional projects.
- **Delivers standard, configurable Packaging Performance capabilities:** Avoid the cost and risk of custom coding or system development by configuring a packaged solution which provides packaging performance best practices
- **Offers scalability and extensibility:** Establish a foundation that enables rapid expansion to other packaging lines and/or additional packaging functionality
- **Leverages proven expertise:** Delivered by experts with deep operations management solutions experience

In short, Accelerator gives you an easy way to get started, allows for future expandability and begins your Operational Excellence journey the right way.

### What's Included?

With Accelerator, you can fully understand and evaluate the power of EnteGreat's Proficy-based Packaging Performance Solution with minimal up-front cost or risk. Throughout your evaluation, you invest only in the services that help get you started. Accelerator includes:

- Access to the right mix of full-featured Proficy software components for your Packaging Performance Solution
- A fixed set of services to install the system, train your team, and support you through the evaluation
- Access to best practices templates to accelerate business benefits
- Availability of a pre-loaded, pre-configured server package to speed deployment
- Access to our world-class GlobalCare technical support to keep you up and running

### About EnteGreat

*EnteGreat is a manufacturing consulting and systems integration company with a singular mission: to help manufacturing companies succeed. EnteGreat's strategy focuses on combining the Management of Technology with Transformative Change to give global manufacturing companies the tools and the knowledge needed to bring about solid, substantial, and sustained improvements. For more information, please visit EnteGreat's web site, [www.entegreat.com](http://www.entegreat.com).*
