

Productivity Packs

Continuous Value to Our HMI/SCADA Customers

GE, through its Proficy® suite of products, offers three powerful and differentiated solutions to applications in the HMI/SCADA arena. They are Proficy View, Proficy HMI/SCADA – CIMPLICITY®, and Proficy HMI/SCADA – iFIX®.

The GE Intelligent Platforms HMI/SCADA products all deliver market leading value thanks to several generations of product release enhancements. Today, our HMI/SCADA products are updated and released on an annual basis.[†]

Starting in 2006, GE introduced “Productivity Packs” – a new program designed to deliver an ongoing value to our HMI/SCADA customers.

Productivity Packs are typically product independent enhancements for GE HMI/SCADA customers. They are comprised of Utilities, Graphic Objects, Drivers, Database Tools, etc. that are valuable enhancements to your application and that can be delivered independently of a major product release.

Productivity Pack items are provided free to all GlobalCare Complete customers and are posted to the GE GlobalCare website in the “Developer Download” section. Some Productivity Pack items will automatically

be included in the next releases of HMI/SCADA product. Others will remain available on the Developer Download site.

While HMI/SCADA product CDs include our base product offerings, a wealth of additional tools, tips and Knowledge Base articles are available from GE GlobalCare, www.ge-ip.com/support.

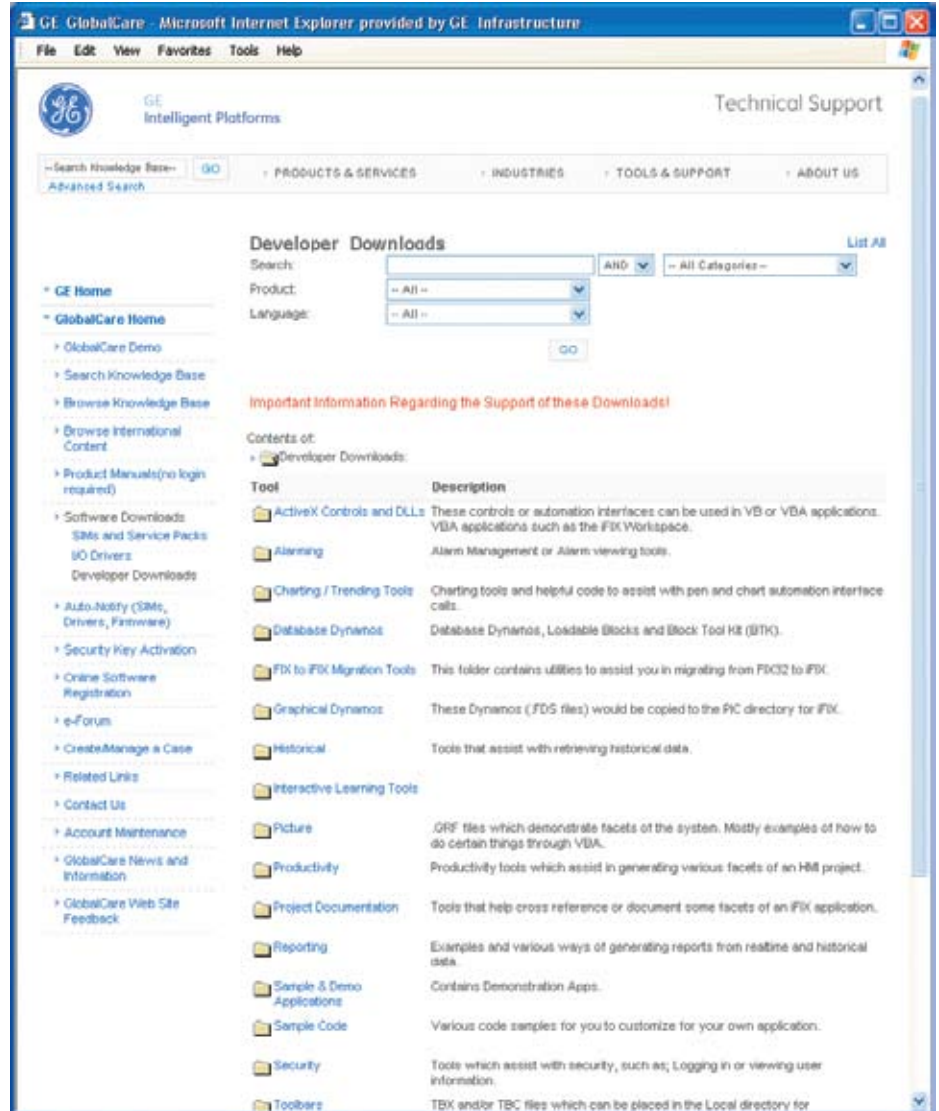

GlobalCare Complete customers will now have access to a whole new set of valuable tools and resources to enhance their HMI/SCADA installations. Productivity Packs are delivered on a continuous (quarterly[†]) basis.

If you have GlobalCare today, the GE support site and Developer Download area should be a standard part of your HMI/SCADA experience. If you have not taken advantage of GlobalCare, please contact your local GE Intelligent Platforms Sales Representative and they will help you understand the ongoing value that awaits you – now and into the future.

[†] Productivity Packs will be delivered in the Quarters that there are no major HMI/SCADA product releases. HMI/SCADA releases are typically on an annual basis. GE Intelligent Platforms reserves the right to change delivery schedules.

Productivity Packs Continuous Value to Our HMI/SCADA Customers

The screenshot shows the GE GlobalCare website in Microsoft Internet Explorer. The page is titled "Technical Support" and features a navigation menu with "PRODUCTS & SERVICES", "INDUSTRIES", "TOOLS & SUPPORT", and "ABOUT US". The main content area is titled "Developer Downloads" and includes a search bar with filters for "Product" and "Language". Below the search bar, there is a section titled "Important Information Regarding the Support of these Downloads!" and a table listing various tools and their descriptions.

Tool	Description
