

## Getting Smart on ISA-95

### Course Description

The **Getting Smart on ISA-95** online module provides an introduction to the ISA-95 Enterprise-Control system integration standard. This course includes an explanation of the models and terminology surrounding manufacturing operations management as related to ISA-95. Online content and interactive course features offer a general introduction to the ISA-95 standard to help you better understand how to apply the standard.

### Who should attend?

This module is intended for anyone interested in learning more about the ISA-95 standard or wanting to prepare for implementing an enterprise/control integration solution.

### Are there any prerequisites?

Participants should be able to use Internet Explorer to watch and interact with multimedia presentations. All participants also need an account at the GE Intelligent Platforms training portal – EDGE.

### What topics will be covered in this course?

The following topics will be covered in this session:

- The problem that ISA-95 address.
- The role of ERP and MES systems in manufacturing.
- The business processes and information associated with integration.
- The standards and models of ISA-95.
- The role of B2MML in enterprise/control integration.
